Hi Barbara !!
well as you know we use a lot the WAIS so i'm very interested in this
new software .. can u tell me more about this please where i can get it
I use all the interfaces you mentioned.
Have a nice Day..

I can't quite tell from the message, but are you responding to mail I sent about Seeker-RAM WAIS software?

Yes (to the CM users group).

If so, to clarify...

There are two types of WAIS software available. There is a freeware release (available through ftp), and the release mentioned in my email which runs on the Connection Machine (Thinking Machine's supercomputer).

If you would like instructions for ftp-ing the freeware release, please let me know, else I will add you to the Connection Machine release list.

Yes, I would like to get the freeware for the CM-2.

Thank you for your interest in WAIS!

No, no, Thank YOU! :-)

Software Announcement]

Hi. Just to clarify...

We have a freeware release of WAIS (that runs on any unix-based machine and Macintoshes), and the WAIS seeker release (which runs on Thinking Machine's supercomputers, Connection Machines)

Do you have access to a Connection Machine? The freeware software is available through ftp. I'd be happy to send you the ftp instructions. Else, I will add you to the Seeker Release list...

thanks,
barbara
